Summary	As a motivated and ambitious Individual, worked on varieties of datasets, and identify trends. Proficient in programming, statistical analysis, data visualization. Seeking a challenging role to leverage my analytical skills, I am excited to collaborate with dynamic teams, acquire new skills, and contribute wholeheartedly to the success of the organization.				
Experience	<b>Oblivisions Technologies</b> Data Analyst Intern		2023-02-10 - 2023-06-09		
	<ul style="list-style-type: none"><li>Contributed to various data <b>analysis projects</b>.</li><li>Developed skills in <b>data visualization</b> and <b>predictive analysis</b>.</li><li>Created dashboards and visual reports using <b>Excel, Power BI</b> and <b>Tableau</b>.</li></ul>				
	<b>accio job</b> trainee  <a href="https://acciojob.com/">https://acciojob.com/</a>		January/2024 - Present		
	<ul style="list-style-type: none"><li>Developed skills in <b>Excel, SQL, Power Bi</b> and <b>Python</b>.</li><li>Enhancing <b>problem-solving abilities</b> through real-world data projects.</li><li>Creating dashboards and reports to support <b>business decisions</b>.</li><li>Attending training on advanced data analytics and best practices.</li></ul>				
Education	<b>IK Gujral Punjab Technical University</b> Computer science and engineering A		2019-07-10 - 2023-06-10 BTech		
	<b>Senior Secondary Residential School For Meritorious Students</b> physics, Chemistry, Mathematics A		2018-04-02 - 2019-03-31 Senior Secondary		
	<b>Government High School, Lohara</b> A+		2016-04-01 - 2017-03-31 Matriculation		
Projects	<b>bank management system</b> Description: Developed a command-line interface (CLI) based bank management system that works with a local database  <a href="https://github.com/abhishek887229/bank-management-system-project-sql-python.git">https://github.com/abhishek887229/bank-management-system-project-sql-python.git</a> <b>Technologies Used:</b> Python, MySQL, Visual Studio Code				
	<ul style="list-style-type: none"><li><b>Key Responsibilities:</b><ul style="list-style-type: none"><li>Designed and implemented a MySQL database schema for storing customer information and transaction records.</li><li>Developed Python scripts to perform Create, Read, Update, and Delete (CRUD) operations on the database.</li><li>Integrated a 6-digit automated primary key generator to ensure unique customer identification.</li></ul></li></ul>				
	<b>Cardiovescular Disease Prediction</b> Description: Developed a web application using Flask to predict the likelihood of a person being targeted by cardiovascular disease.  <a href="https://github.com/abhishek887229/cardiovescular_prediction.git">https://github.com/abhishek887229/cardiovescular_prediction.git</a> <b>Technologies Used:</b> Python, Pandas, Matplotlib, Machine Learning, Flask <b>Objective:</b> The app is designed to providing a quick classification of cardiovascular disease risk.				
	<ul style="list-style-type: none"><li><b>Key Responsibilities:</b><ul style="list-style-type: none"><li>Performed data preprocessing and exploratory data analysis (EDA) using Pandas and Matplotlib.</li><li>Implemented machine learning models using the scikit-learn library to train and test the data.</li><li>Designed and deployed a user-friendly web interface to allow users to input data and receive real-time predictions.</li></ul></li></ul>				
	<b>Visualization on Electric Vehicle</b> Description: Built an interactive dashboard using Tableau, leveraging a government open dataset on electric vehicles (EV). Data cleaning and preprocessing were performed in Excel before visualization.  <a href="https://public.tableau.com/app/profile/abhishek.kr2701/viz/Ev_data/Dashboard1">https://public.tableau.com/app/profile/abhishek.kr2701/viz/Ev_data/Dashboard1</a> <b>Technologies Used:</b> Excel, Tableau <b>Objective:</b> The dashboard provides clear, accessible insights into electric vehicle data, facilitating data-driven decision-making for stakeholders.				
	<ul style="list-style-type: none"><li><b>Key Responsibilities:</b><ul style="list-style-type: none"><li>Cleaned and preprocessed the data using Excel, ensuring accuracy and consistency.</li><li>Developed a comprehensive dashboard in Tableau</li><li>Utilized Tableau's advanced features to create interactive elements, enabling users to explore the EV data dynamically.</li></ul></li></ul>				
	<b>Weather Analysis</b> Description:- Weather analysis examines atmospheric conditions to predict patterns by collecting data on temperature, humidity, wind,wind direction, pressure.  <a href="https://github.com/abhishek887229/capestone_weather_analysis_project.git">https://github.com/abhishek887229/capestone_weather_analysis_project.git</a> <b>Technologies Used:</b> Python, Excel, Power BI <b>Objective:</b> The project aims to provide a detailed view of how weather changes with natural factors.				
	<ul style="list-style-type: none"><li><b>Key Responsibilities:</b><ul style="list-style-type: none"><li>Transformed raw weather data using Python, ensuring data quality and consistency.</li><li>Performed EDA using Excel to identify trends, patterns, and correlations in the weather data.</li><li>Created interactive dashboards in Power BI</li></ul></li></ul>				
Skills	<b>Python</b> <div><div></div><div></div><div></div><div></div><div></div><div></div></div>	<b>MySql</b> <div><div></div><div></div><div></div><div></div><div></div><div></div></div>	<b>Power Bi</b> <div><div></div><div></div><div></div><div></div><div></div><div></div></div>	<b>Excel</b> <div><div></div><div></div><div></div><div></div><div></div><div></div></div>	<b>Google Colab</b> <div><div></div><div></div><div></div><div></div><div></div><div></div></div>
	<b>Web scraping</b> <div><div></div><div></div><div></div><div></div><div></div><div></div></div>	<b>Tableau</b> <div><div></div><div></div><div></div><div></div><div></div><div></div></div>
